U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No.

Serial No. 09/720,691

Art Unit 1771

1. The use of the trademark found in the example of the suitable varnish at page 8 lines 11-19 where multiple marks are used and only some of them are provided with suitable generic compositions has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

2. The disclosure is objected to because of the following informalities: At page 5, line 10, the term "methylmetracrylate" should be --methylmethacrylate--. At page 5 lines 17 and 20, and elsewhere the term "silicon" should be --silicone--.

Appropriate correction is required.

3. The following is a quotation of the second paragraph of 35 U.S.C. § 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 3 and 5 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. More particularly, claim 3/1 appears to be a duplicate of claim 5.

Serial No. 09/720,691 Art Unit 1771

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- 6. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claim 4 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Eagon. Note particularly the Figures, column 1 lines 13-15, line 63 column 2 line 23, column 2 line 64 column 3 line 6, column 5 lines 47-51. The release strength factor range is believed to be either inherent in the reference, or at most an obvious optimization to one of ordinary skill, particularly since the reference is taken from substantially the same field of technology as applicant's invention.

Serial No. 09/720,691

Art Unit 1771

- 9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note particularly Instance -575 and -214, Cusack et al. and Yerger.
- 10. Claims 1 and 2 are allowed. Claims 6-18 are each objected to as being dependent upon a rejected base claim.
- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel Zirker whose telephone number is (703) 308-0031. The examiner can normally be reached on Monday-Thursday from 8:30 A.M. to 6:00 P.M. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris, can be reached on (703) 308-2414. The fax phone number for this Group is (703) 872-9310.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0661.
